# Seagate ClusterStor: Why Should You Care?

Lustre®

IBM Spectrum Scale

## Performance Efficiency

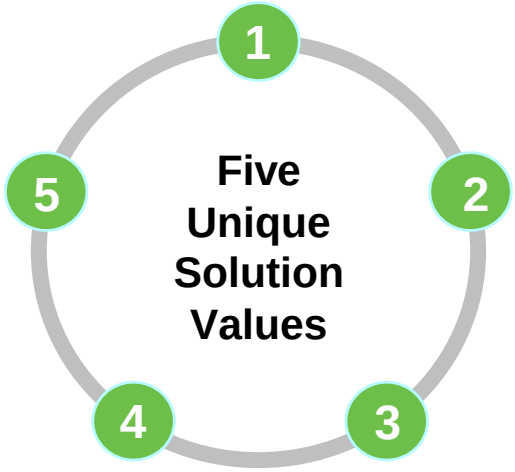
Highest performance throughput per storage device.

**Less hardware needed to achieve performance requirements**

### Reliability

Industry's highest quality disk drives with lowest disk failure rate and no single point of failure architecture

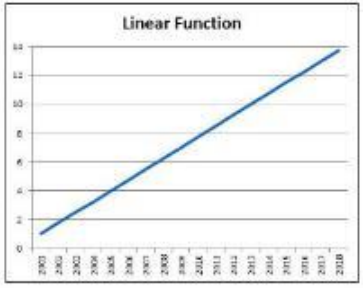
**Less rebuilds and less downtime**



### Fully Integrated Solution

Pre-integrated, tested, tuned, and shipped ready to deploy.

**Days instead of weeks to implementation**



### Scalability

Sustained linear performance when adding capacity

**Predictable application performance**

### Enterprise-grade Management and Support

Comprehensive file system management, RAS/Phone home, holistic hardware monitoring with health alerts, API

**Less downtime and Faster-Time-To-Problem Resolution**
