

IMAGINE... A NEW GALAXY

EarthLab Programme : A Galaxy of worldwide centres
using remote sensing devoted to environmental

Forum Teratec 2014
Technical Workshop: Digital technologies for plant
Paris 02/07/2014

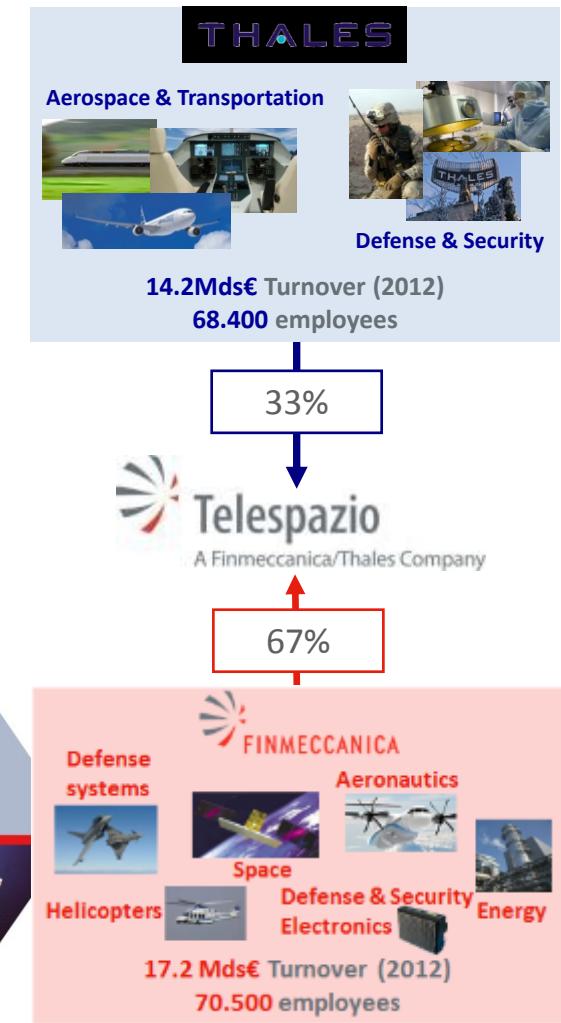

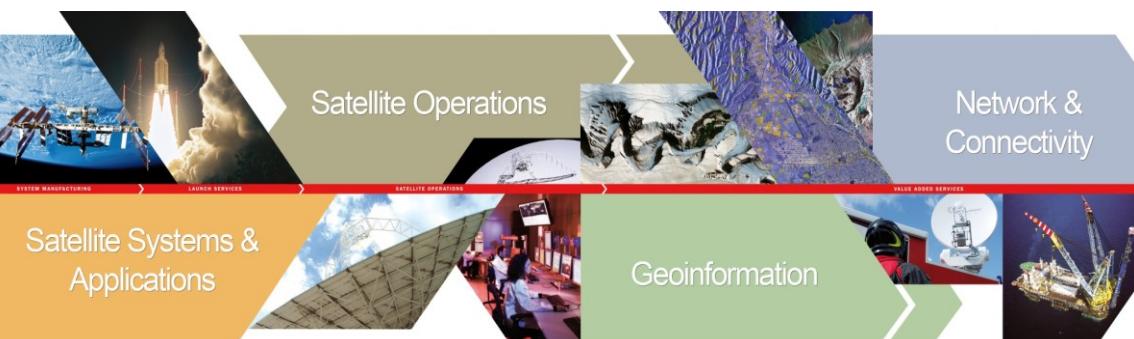

TELESPAZIO

A world leading provider of space applications

Key group figures

- **25** sites over 8 countries
- **4** space centers, with the largest commercial **teleport** in the world
- A turnover of 600 million euros in 2013
- More than **2500** employees
- Over **3000** clients in more than **100** countries

A service portfolio based on 4 expertise

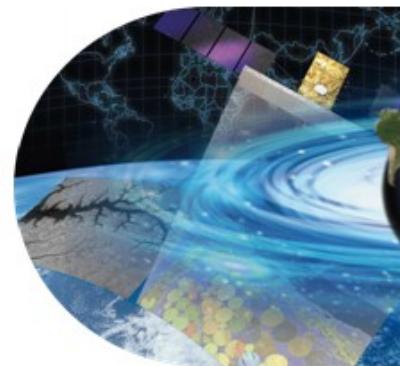

EarthLab

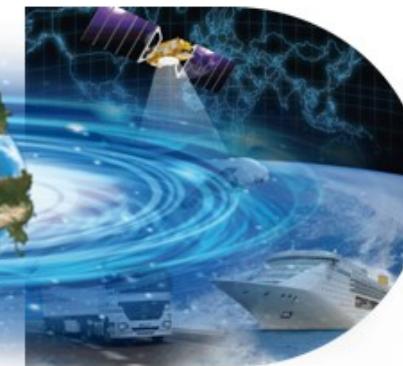

Towards a global geo-information's cluster

Worldwide deployment of Centers of Research & Development for the production of integrated Geo-Information in response to local environmental issues

Partnerships & Local co-investments

Structuring a global R&D eco-system

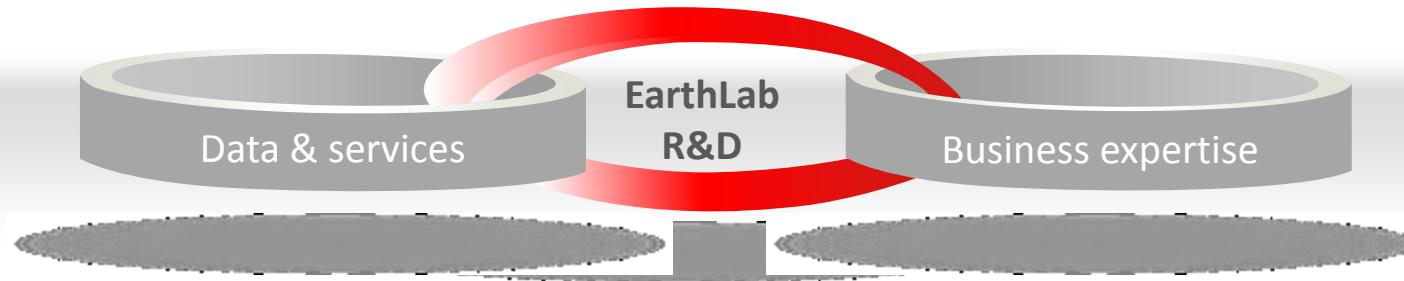

Daily Interface with users to create products and value added services

Combination of data from space-based sensors, unmanned technologies

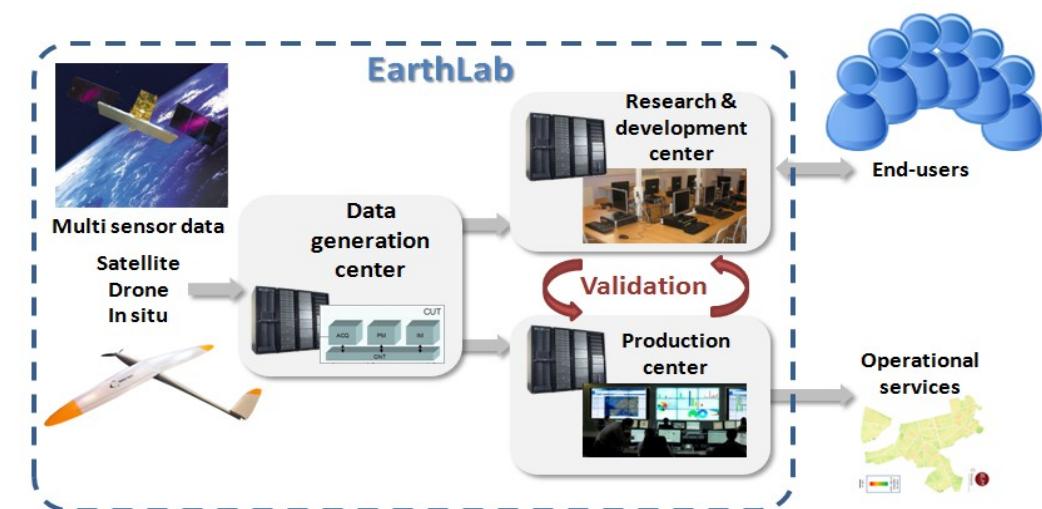

Local public & private partnerships
governments, local authorities, Big companies, Research centers, start-up

Research and Development as a strategic engine

Combine access to data and satellite expertise services

with land and business expertise on each economic sectors concerned

To meet specific **user needs** by offering comprehensive services economically viable

2014

The catalog "Products & Services" EarthLab rise

- **AGRICULTURE, VINE, FORESTRY AND COASTAL MONITORING**

- *in cooperation with the Aquitaine Region =>*

EarthLab
« ORIGINEL »

- **MARITIME SURVEILLANCE AND MAPPING**

- *oceans and land in sub-Saharan Africa in cooperation with the Gabonese Republic (and AGEOS, FGIS)*

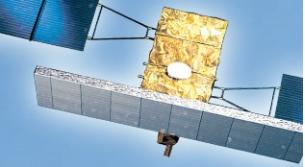

EarthLab
GABON

- **THE DEPLOYMENT IN PROGRESS**

- covering additional environmental issues in other parts of the world*

- > *In Europe (Industrial & environmental Risk)*
 - > *In Asia (water issues)*
 - > *In North America (ice monitoring)*

EarthLab sensors dedicated to plant

EarthLab applications dedicated to plant

Vines

Forest

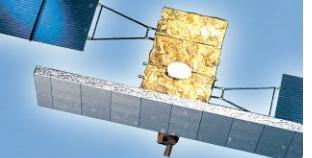

Crops

EarthLab applications dedicated to plant

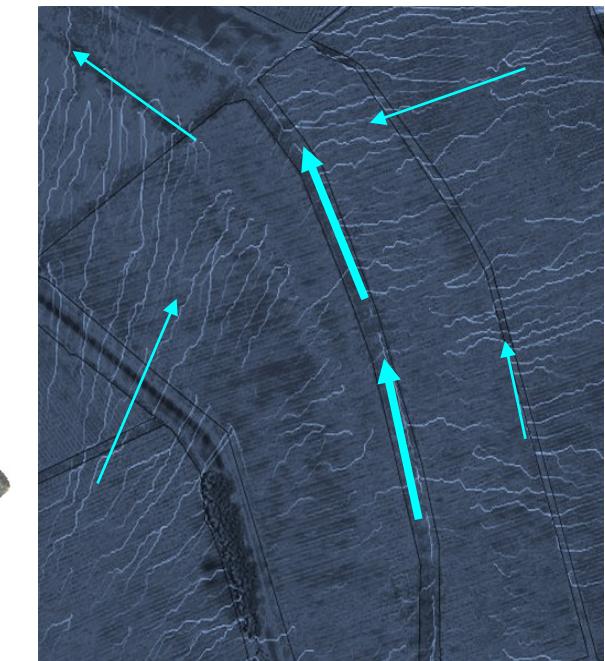

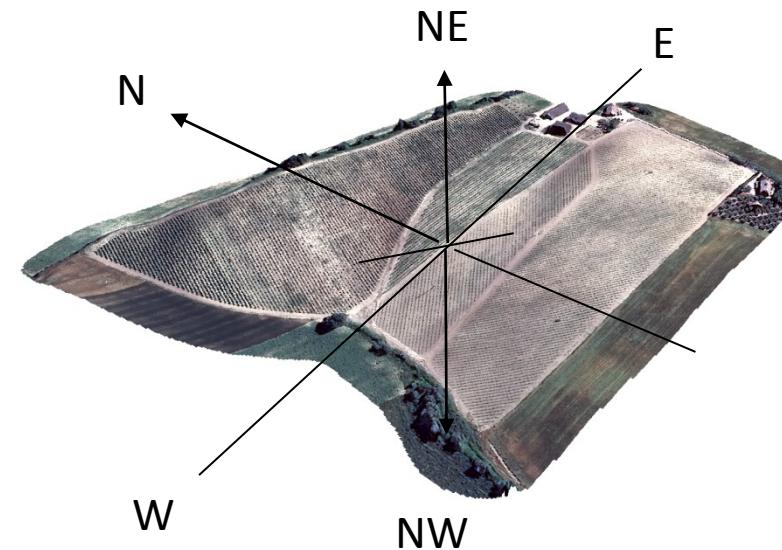

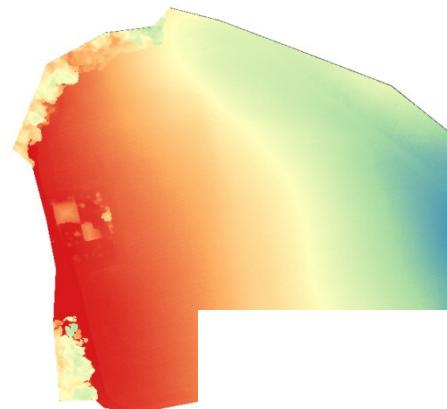

Vines

Vineyard audit

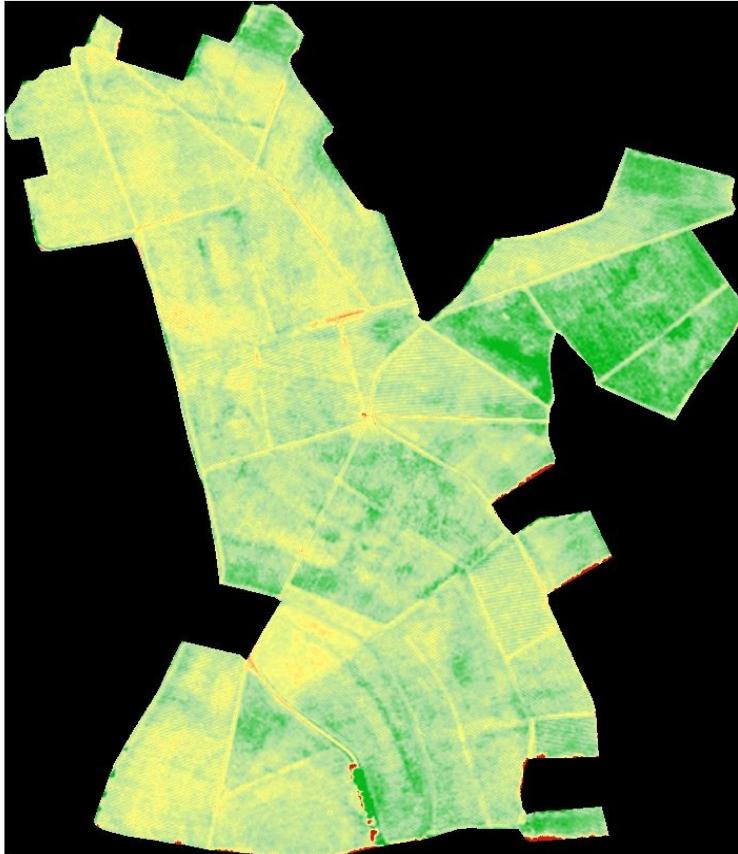

- Mapping slope, exposure.
- Hydrological flow modeling, erosion probability.

Agriculture optimization

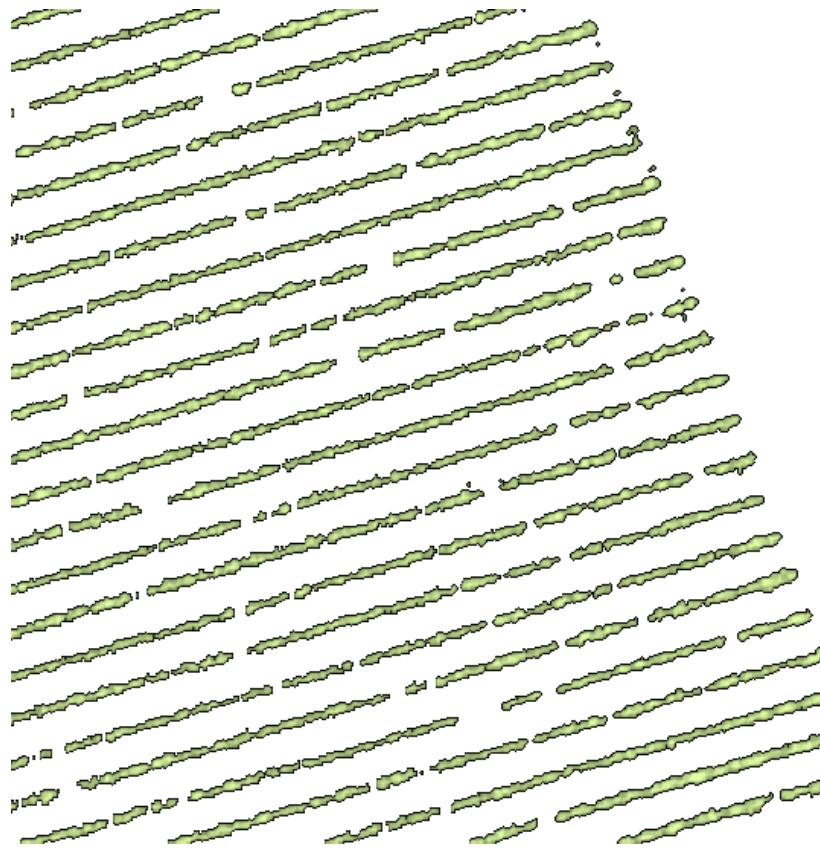

Crop inputs (water, fertilizer...) variable rate application

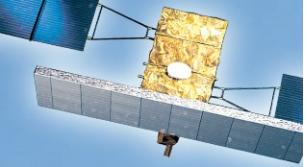

Vineyard upkeep

Missing vines detection

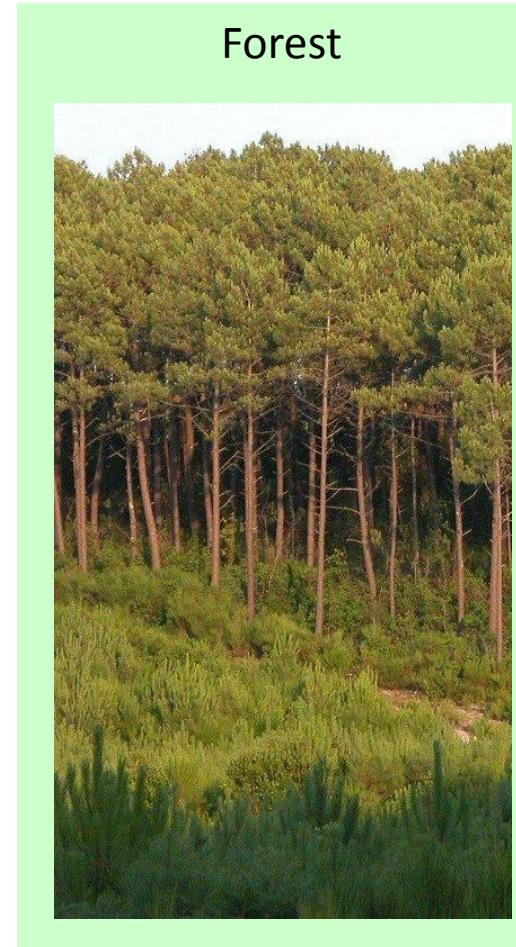

A Finmeccanica/Thales Company

EarthLAB

EarthLab applications dedicated to plant

 Telespazio
A Finmeccanica/Thales Company

Ressource management

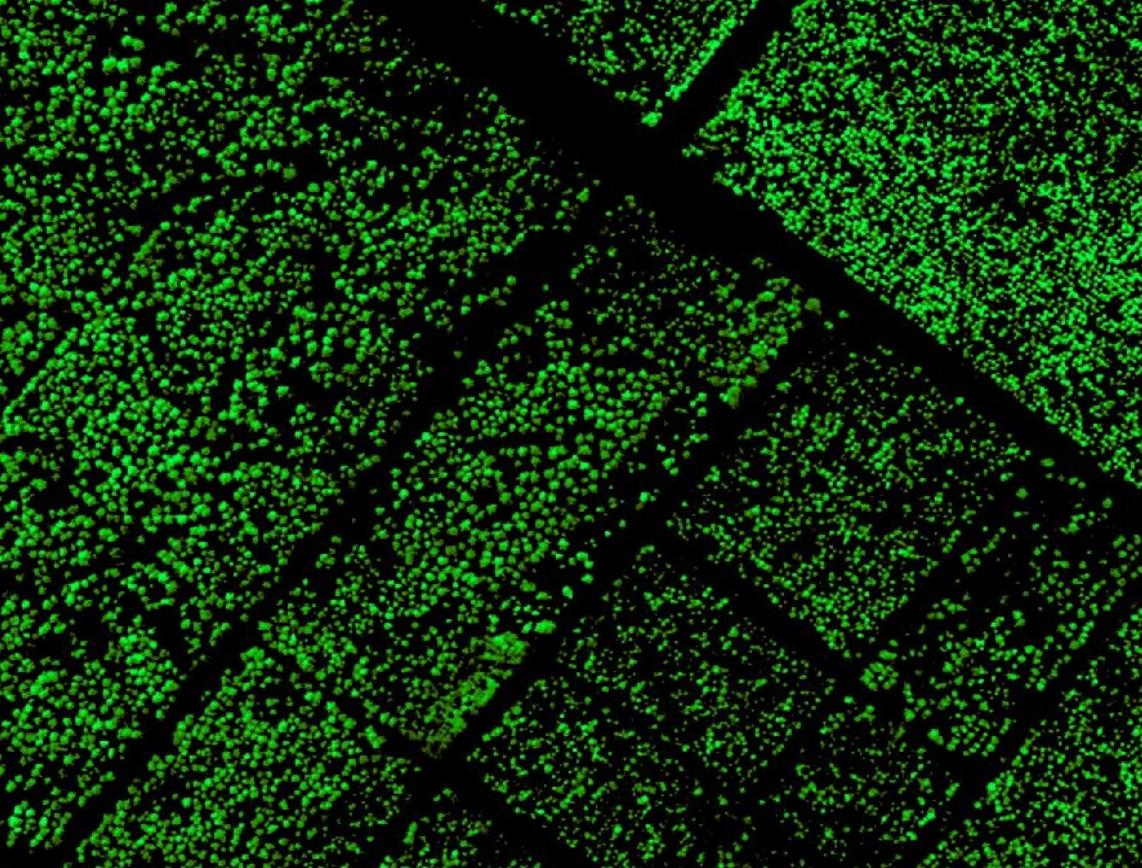

- Density classes based on satellite images for forest management

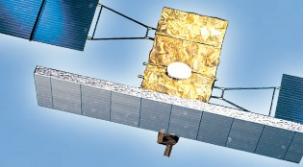

Ressource management

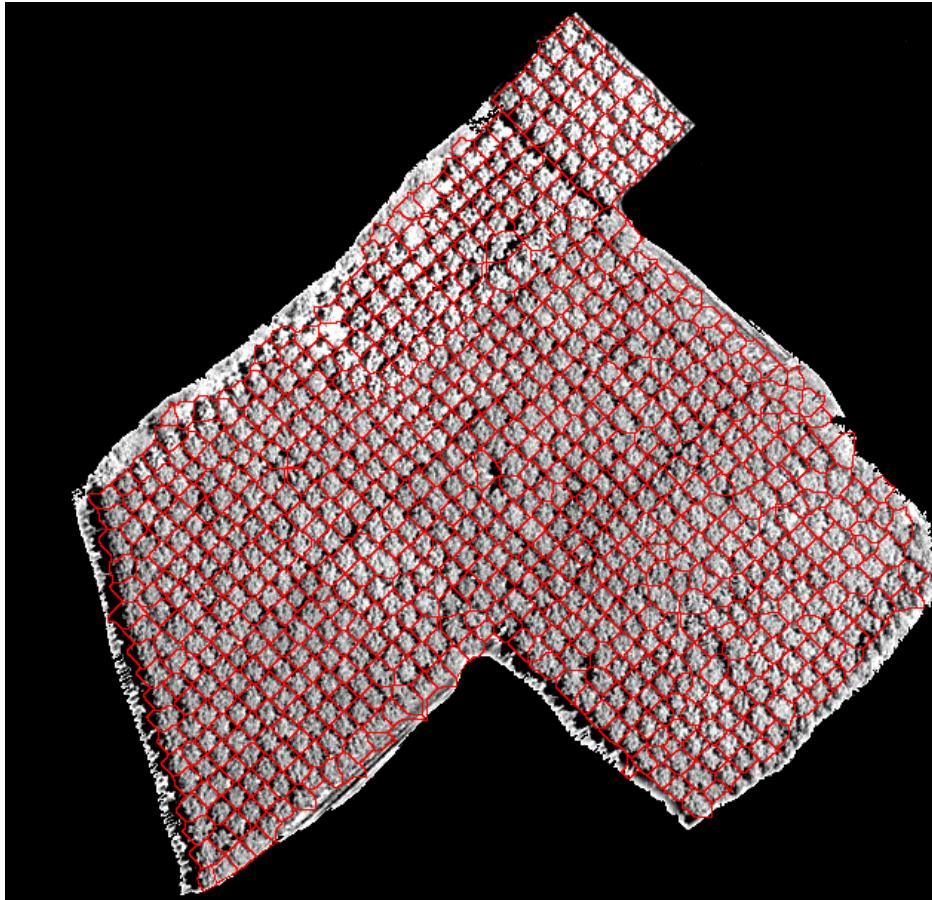

- Tree crown detection and counting based on optical VHR imagery

Ressource management

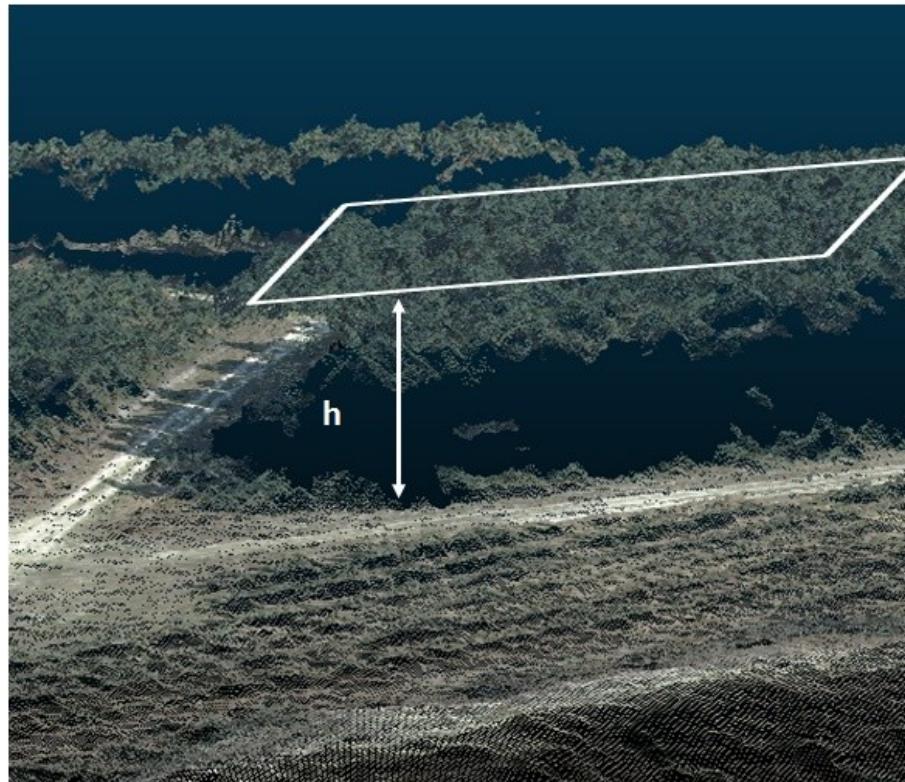

- Automatic timming trees

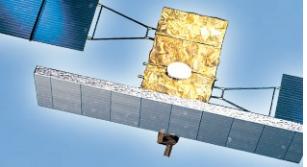

Ressource management

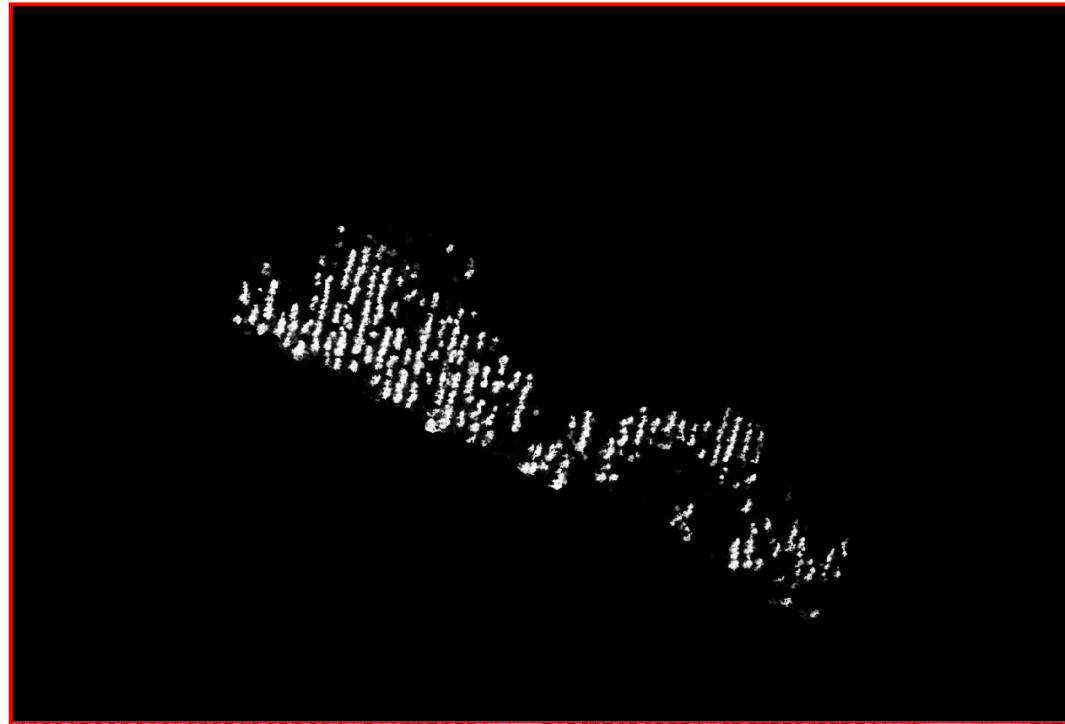

- Canopy height measurement

Forest health management

Health monitoring : chablis, defoliations and mortality

EarthLAB

EarthLab applications dedicated to plant

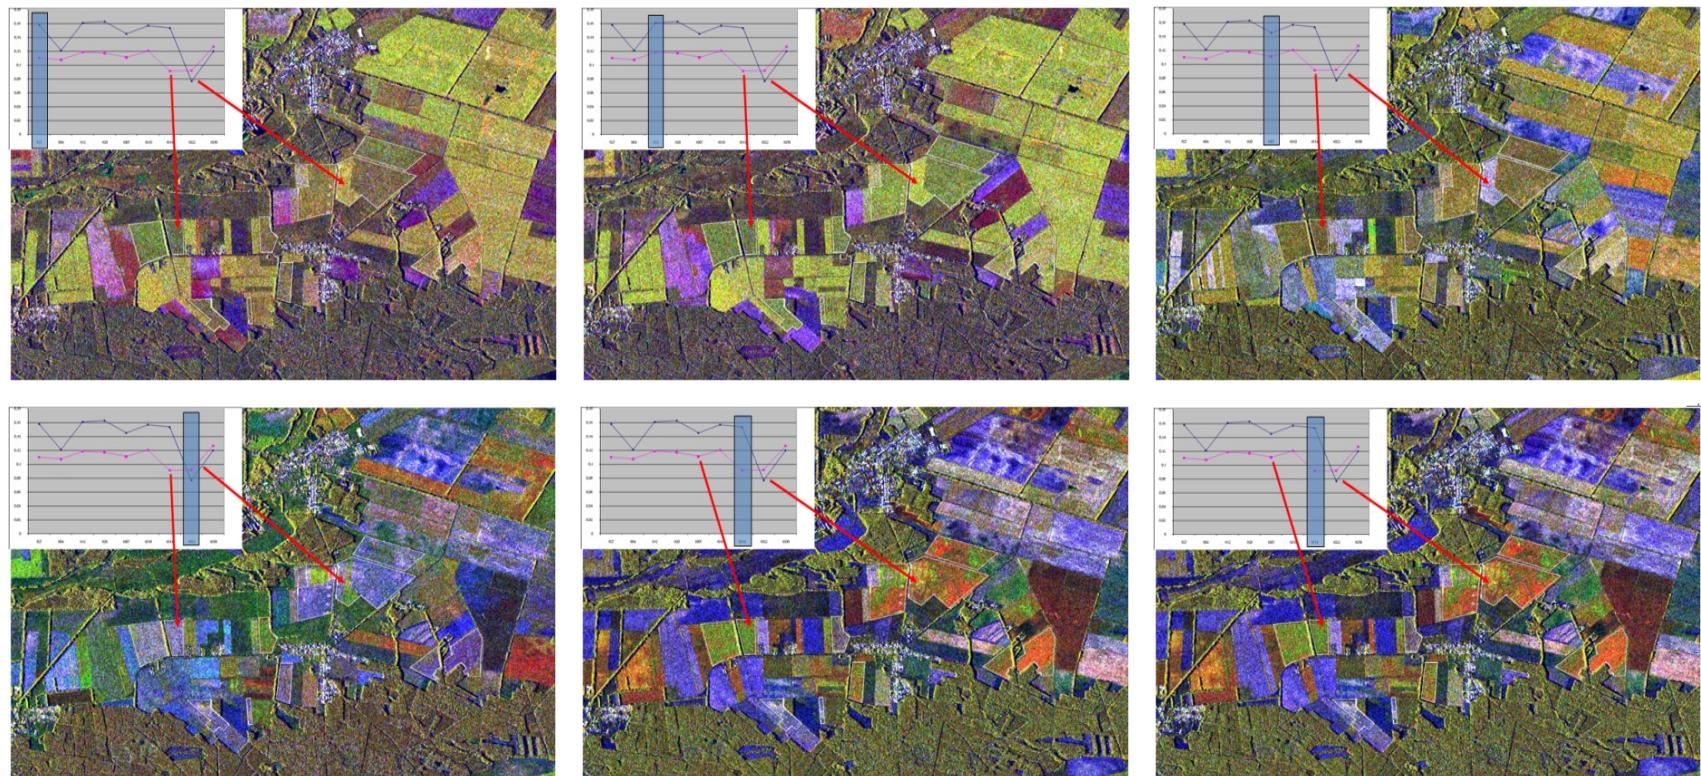

Crops

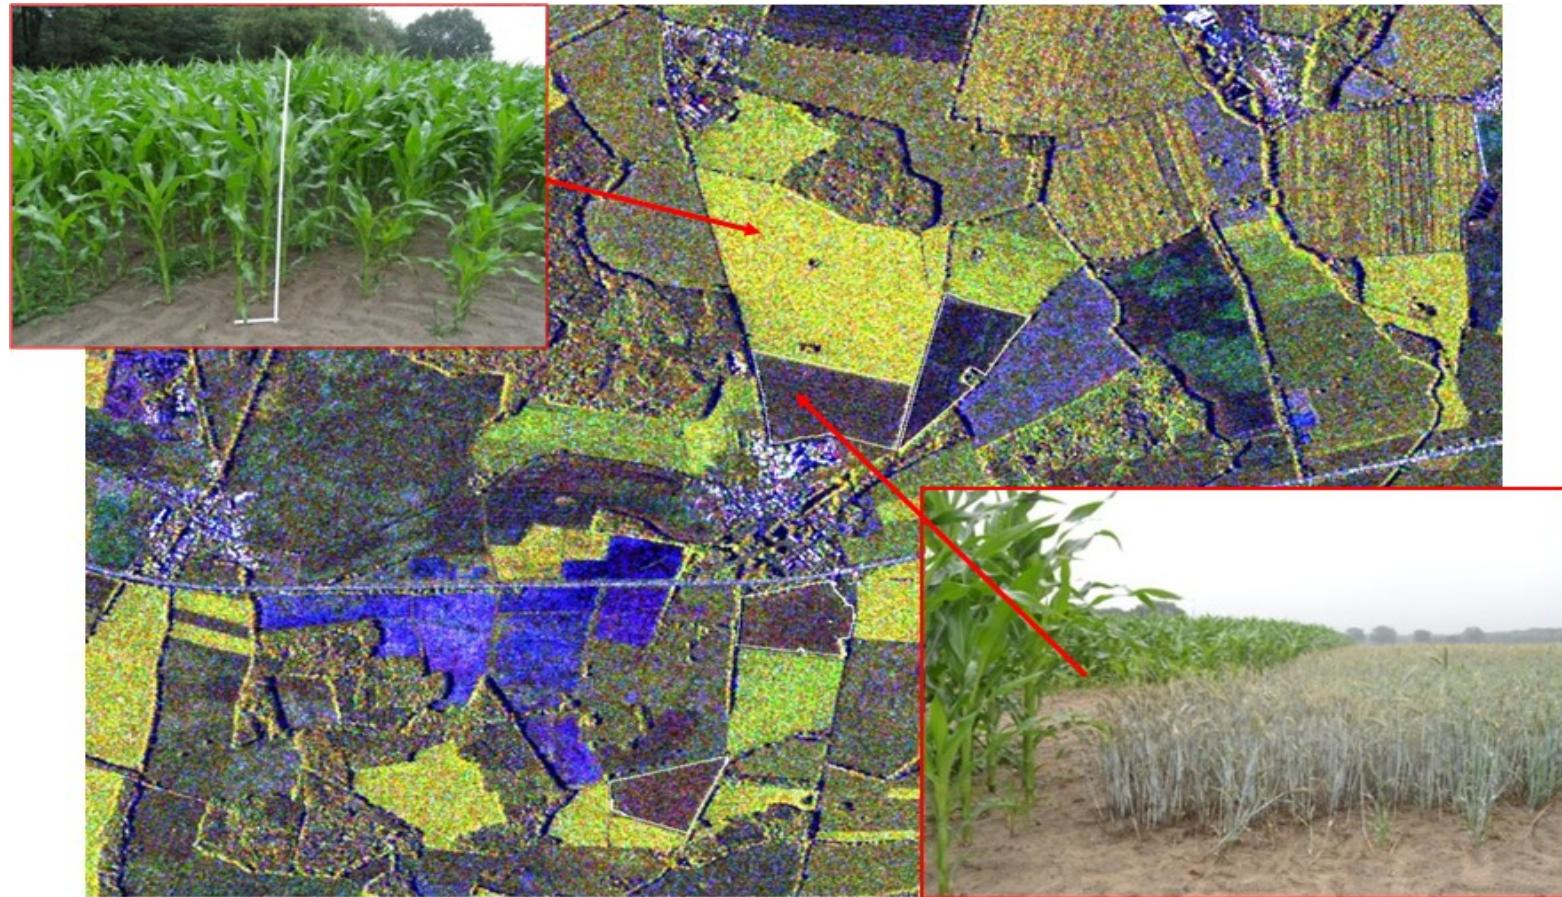

Cereal: Biomass estimation

- Combination of SAR images to extract biomass information

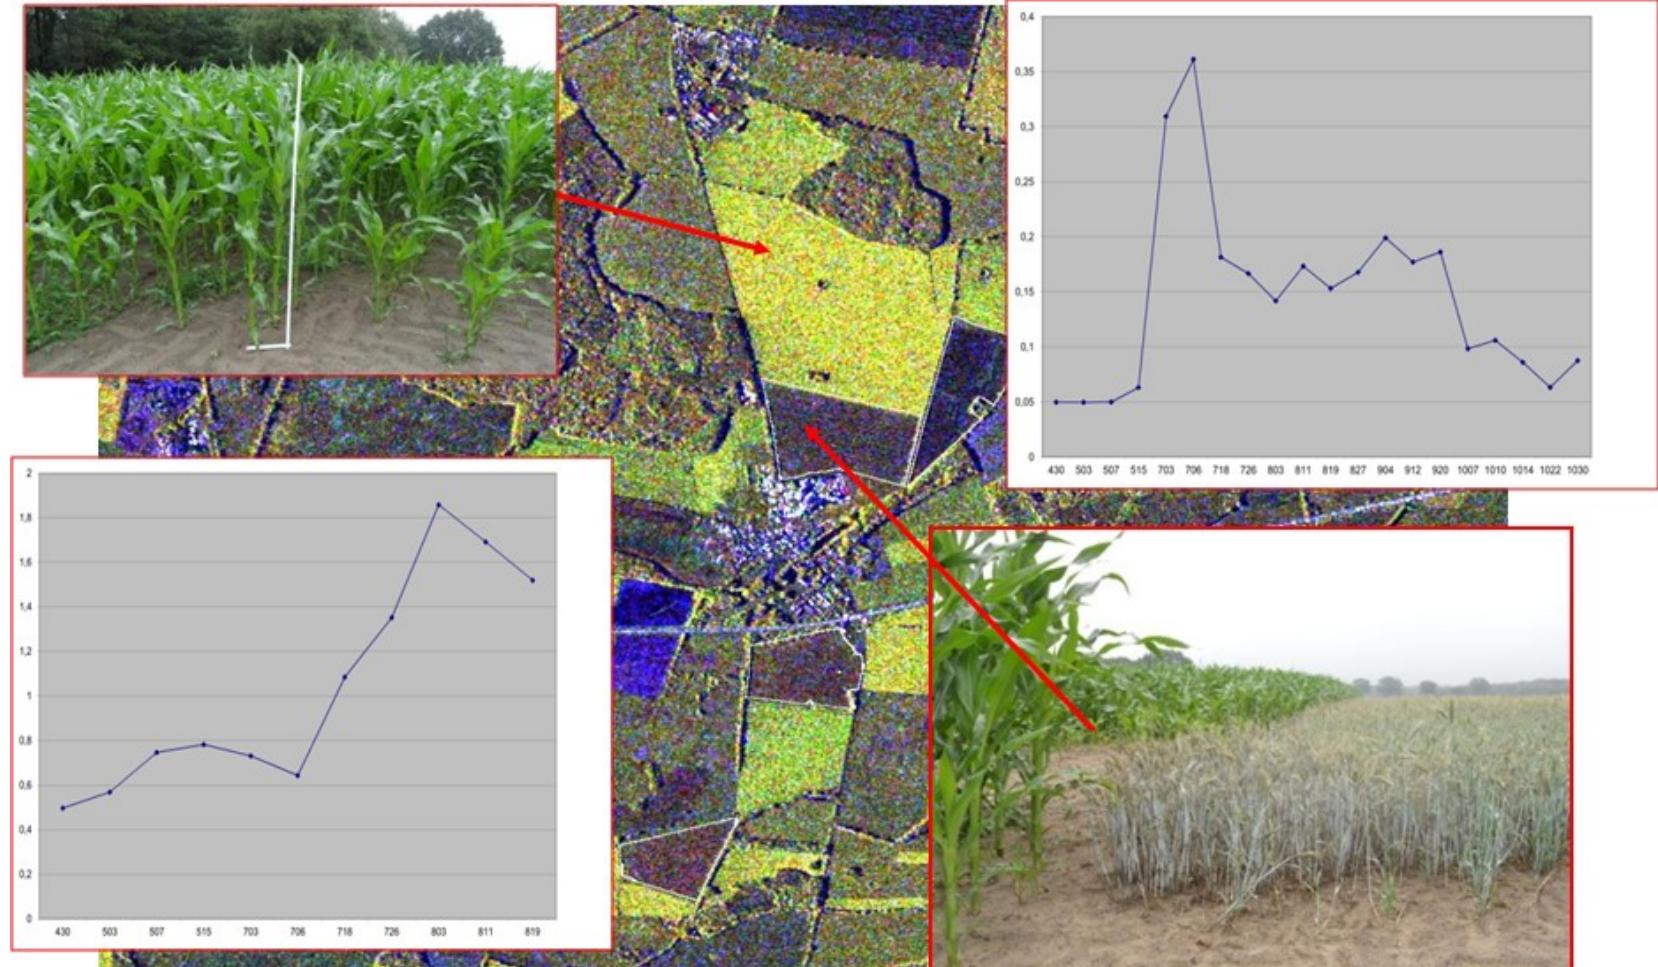

Biomasse estimation

Corn vs Rye: growth evolution

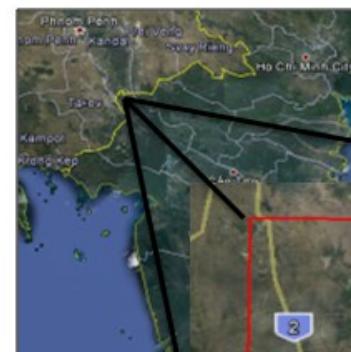

Biomasse estimation

Corn vs Rye: growth evolution

RICE MONITORING

Vietnam test site: South An Giang province - Sites of Thoai Son (yellow on the image)

Cosmo SkyMed data:

StripMap Pingpong: HHVV
20m, 30km swath
Incidence >40°
3 images : 19 Aug, 4 & 20 Sep, 2013 (10 expected)

An Giang (Thoai Son & Chau Than): 40 In-situ data collect

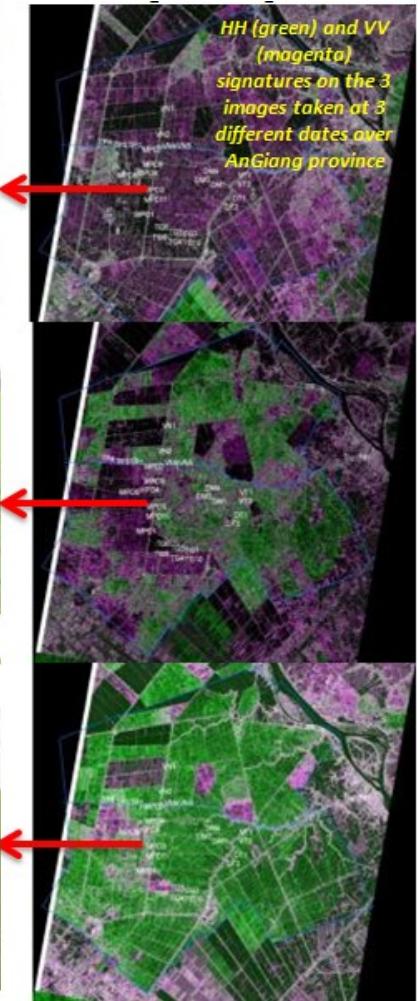

19 Aug 2013

4 Sep 2013

13 Sep 2013

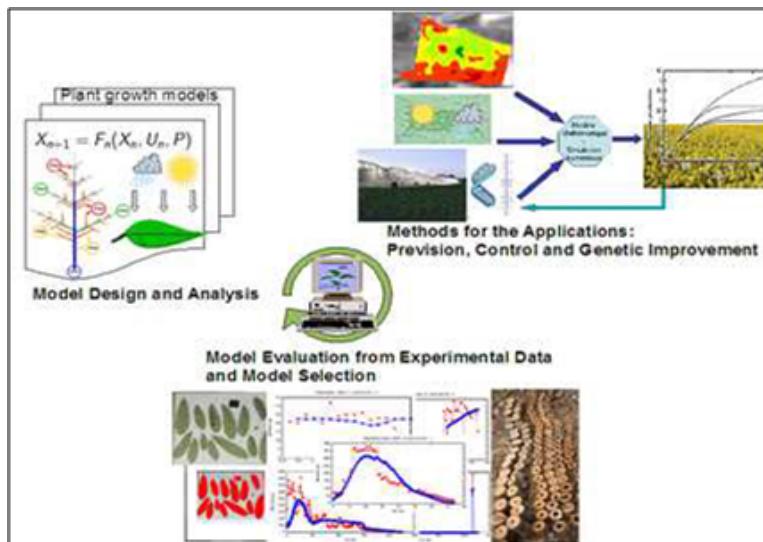

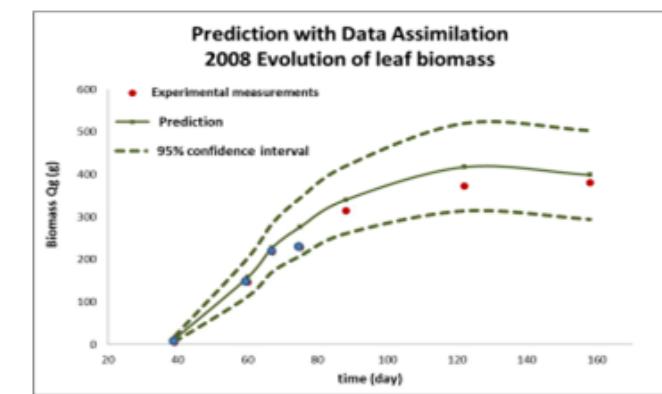

EarthLAB

RICE MONITORING

- Biomass estimation and yield forecast

Plant growth model: parametrization and calibration for rice crop

Application for yield production

(results obtained at the experimental farm of China National Hybrid Rice R&D Center, Changsha, China)

Earthlab derived services

- Yield forecast and risk assessment
- Biomass estimation and annual assessment report on crops production
- Decision-aid tool for farming practices (irrigation, fertilization, pest and disease control)
- Green House Gas (GHG) rejection assessment
